

Our Mission - Help you to obtain your goal !!! Rapidly - Economically - Trustworthy From idea to final product.

Flaxer Engineering Solutions is a consultation, research and developing office. FES has experience in researching, developing and manufacturing, cost effective tailor-made high technology products. FES capabilities cover the full spectrum of applied research and commercial products - from simple hardware to sophisticated electronic and physical systems.

We are working in a wide range of the following fields:

- Sensors, Transducers and Interfaces.
- Motion & Nano-Motion Controllers.
- Digital & Analog Control Systems.
- Digital Design & Modeling - VHDL.
- Software Design - C/C++/C#/LabView.
- Embedded & Wireless Systems.
- Physical Systems - Analysis & Modeling.
- Mechatronics and Power Electronics.
- Digital Signal Processing & MATLAB.
- Imaging, Vision & Machine Vision.
- Board Design and Spice Modeling.

We accompany our customers all the way of the project - from idea to final product.
